

## Chronicle Armory Management Module

---

Developed in partnership with the former Home Office Scientific Development Branch (now known as CAST), the Chronicle Armory Management System is designed to provide efficient and effective day-to-day management of the issue, return and maintenance of firearms and munitions through the use of RFID technology. Linked to our secure door access, you can be assured that your weapon inventory is accounted for 24/7. Chronicle Armory Management controls access to armouries and weapons based on an individuals' current authorisation level and is seamlessly linked to the Firearms Training and Operations, CED or Public Order modules to ensure only currently authorised personnel can gain access.

The system is capable of coping with numerous transactions at multiple locations simultaneously, whilst enabling organisations to centrally monitor the issue and return process where supervision is a problem. In addition, the armoury system provides Armourers or Weapon Maintainers with service and maintenance tracking history and ammunition stock control information, providing automatic email alerts when service or maintenance is due or a weapon return is overdue.

### FEATURES AND BENEFITS GENERIC TO ALL CHRONICLE MODULES

**Designed in collaboration with police officers:**

Tailored to meet the operational demands of your force, collaboration or region.

**Robust audit trails:**

Provide fully auditable and accurate records for any investigation, thus protecting your officers and your force. Enable fast, cost-effective responses to FOI requests.

**Available on Police ICT and G-Cloud procurement frameworks:**

Save tender costs and streamline the procurement process whilst reducing your procurement risk.

**Feed critical capability & capacity data directly to NPOCC:**

Eliminate the need for spreadsheets and reduce the administrative burden. Save time and cost whilst providing accurate, real-time information.

**Skills exporter and interfaces available:**

Save time and cost by eliminating double-keying and ensuring data is consistent across systems.

Link skills to duties to ensure you have the right people with the right skills in the right place.

## FEATURES AND BENEFITS SPECIFIC TO THE CHRONICLE ARMOURY MANAGEMENT MODULE

Immediate issue/no issue decision based on level of officer authorisation	<p>Enforce authority at the point of issue as stipulated by the Code of Practice on Armed Policing and Police use of Less Lethal Weapons</p> <p>Protect officers and the organisation by only allowing currently authorised officers access to weapons</p> <p>Protect the public by ensuring all officers carrying firearms are currently authorised</p>
