Chronicle Asset Cabinets

Chronicle Asset Cabinets are designed to provide efficient and effective day-to-day management of the issue and return of Conducted Energy Devices (CED).

Using our established, robust armoury technology, the issue, return and maintenance of CEDs can be centrally monitored and controlled whilst being secured by our Asset Cabinets, negating the need for supervisors at remote locations.

Email alerts for the late return of CEDs or for unauthorised attempts to access the door of a Chronicle Asset Cabinet ensure that your force is quickly notified of issues requiring investigation and action.

Following the wider use and roll out of CEDs to Specially Trained Officers (STOs) at multiple, and often remote, locations, it is important for forces to safeguard the security of CEDs as well as ensuring that only authorised STOs have access to them.

Our networked Chronicle Asset Cabinets provide your force with the ability to secure CEDs in purpose-built, secure cabinets which utilise the same access control features as our Armoury management system. This ensures that only authorised STOs can gain access to the CEDs. Access to the cabinet is based on an individuals' current authorisation level as calculated by Chronicle, to which the Chronicle Asset Cabinet is seamlessly linked.

FEATURES AND BENEFITS GENERIC TO ALL CHRONICLE MODULES

Designed in collaboration with police officers:
Tailored to meet the operational demands of your force, collaboration or region.

Robust audit trails:
Provide fully auditable and accurate records for any investigation, thus protecting your officers and your force. Enable fast, cost-effective responses to FOI requests.

Available on Police ICT and G-Cloud procurement frameworks:
Save tender costs and streamline the procurement process whilst reducing your procurement risk.

Feed critical capability & capacity data directly to NPoCC:
Eliminate the need for spreadsheets and reduce the administrative burden. Save time and cost whilst providing accurate, real-time information.

Skills exporter and interfaces available:
Save time and cost by eliminating double-keying and ensuring data is consistent across systems.
Link skills to duties to ensure you have the right people with the right skills in the right place.

CHRONICLE SYSTEMS

FEATURES AND BENEFITS SPECIFIC TO THE CHRONICLE ASSET CABINETS

Immediate issue/no issue decision based on level of officer authorisation	Protect officers and the organisation by only allowing currently authorised officers access to CEDs
	Enforce authority at the point of issue as stipulated by the Code of Practice on Armed Policing and Police use of Less Lethal Weapons
	Protect the public by ensuring all officers carrying CEDs are currently authorised to do so
Full Audit record of all issues, returns and movements	Provide a complete auditable history for any CED transaction.
	Prevent CEDs which have not been maintained from being issued
	Prevent CEDs with faults from being issued
	Receive instant email alerts if a CED has not been returned after a user defined time
	Provide detailed auditable records for any post incident or FOI
Management information and full weapons inventory at any given time	View location and condition of all CEDs across your estate from any location
	View which CEDs are currently issued to which officers for what purpose at any time
	View the deployable condition of all CEDs across your estate to maximise deployments
Access Control fitted with Anti-Tamper	Only allow currently authorised STOs access to any Asset Cabinet
	Complete audit trail of who opened which Cabinet and when
	The Asset Cabinets allow for single person access or a buddy system where two authorised STOs are required to gain access thus increasing security and negating the need for a supervisor
	Remotely block access to any Asset Cabinet
	Instant email alert if an unauthorised STO attempts entry
	Instant email alert is sent if the lock is tampered with to ensure integrity of the Asset Cabinet
	Insecure door alerts are instantly sent to ensure security of the CEDs
Email notifications sent in the event of unauthorised entry attempt, tampering, door left insecure or late return of asset	Ability to investigate and act quickly; reducing risk to officers, the public and your force's reputation
Central administration, monitoring & reporting	The system is capable of managing numerous transactions from multiple Asset Cabinets at multiple locations simultaneously
	Remove the need for a supervisor in remote locations
Automated issue and return of all weapons which are fitted with unique RFID tags	Reading of the RFID tags eliminates manual errors
	Reduce CED issue & return times ensuring longer operational capability
	Cost effective proven solution over many years
Maintenance schedule for all weapons with automatic notifications	Complete auditable maintenance records for all your CEDs
	Set up maintenance schedules according to manufacturer's recommendations and any local or national recommendations
	Receive e-mail reminders of CEDs which are nearing their maintenance date to ensure the weapon estate is kept fully operational
	Easy to view maintenance schedule overview provides you with a holistic view of all force CED's in relation to their maintenance schedule
